

identify the two a^2 rays

Cone disk P , cut open

$$0 < \theta_i < \pi/3$$

$$\Omega = \sum_{i=1}^6 \theta_i < 2\pi$$

Shorter angular arc:

$$\phi \leq \Omega/2$$

$$|p - p'| = 2\sin(\phi/2)$$

$$B' \subset \text{int } B$$

Schematic; not metric data
