

(a) Feasible witnesses in L_X

$$\max_{Y \in L_X} |b_3 Y| = 2a < \lambda(0)$$

$$a = \lambda(0.9)$$

(b) Feasible simplices in C

$$\Sigma_X = \text{conv} \{ \pm b_1, \pm b_2 \}$$

$$|C \setminus \Sigma_X| = \sqrt{3}/2$$
